With us you get:

... and much more!

General advantages of plastic pipes:

no root penetration
corrosion-resistant
resistant to crack
long-term tight connection

These advantages make it possible, to avoid the most frequent causes of pipeline damage, by the use of plastic pipes.

STAR Piping Systems GmbH

Your system provider in terms of pipeline construction.

For two decades now, we have been developing and producing innovative polymer piping systems, which we manufacture in Wesel, Germany. Our products are made from the tried and tested materials polypropylene (PP) and polyethylene (PE).

As a system provider, we deliver high-quality and efficient solutions for applications in industry, disposal and supply. Our sophisticated all-in-one solutions are deployed around the world. They mainly transport waste water, service water, gas or drinking water.

Thanks to our diverse production possibilities, we are able to manufacture special sizes and to combine assemblies in almost every imaginable combination. This results in completely individual components, with which you receive efficient solutions for almost every construction project.

Pipe systems	Pipe fittings	Semi finished products	Maschinen
Dimensions: d 20 - 1400 mm	Dimensions: d 20 - 2500 mm	Dimensions: d 120 - 2575 mm	Dimensions: d 20 - 2200 mm
Types: Sewage / Waste-water pressure / Industrial / Gas / Drinking water and Cable protection pipe	Types: customized solutions and other materials on request	Types: Standard length 2,000 mm (Cuts on request)	Types: Universal electrofusion units, field and workshop welding machines, scraping machines and saws

STAR. SOLUTIONS YOU TRUST.
made in Germany
